

Potential Crosswalk Enhancements Considered

Across 36th Ave. at Welcome Ave.

The existing crossing has some challenges.

- 36th Ave. is the busiest city street in Crystal.
- Crosses five lanes of traffic in a high-speed area.
- Curve obscures oncoming traffic.
- Drivers can be confused by angled crossing and nearby bus stop with waiting riders.
- Very close to Hwy. 100.
- South side of street can be dark.

We want to hear from you...

PEDESTRIANS: What time of day do you typically use this crosswalk?
What are your main concerns when crossing?
Where are you going to/returning from when crossing?

DRIVERS: Can you see pedestrians as you approach the crossing?
When do you first see pedestrians?
What area/business are you visiting via this intersection?
